Hiring Team

Berlin, Germany

Praktikant / Werkstudent Projektmanagement - Tax (m/w/d) in Berlin

Dear Hiring Team,

After prompting more AIs, querying more messy databases, and automating more workflows than I'd like to admit, I've learned that real impact happens where product thinking, clean data, and smart technology meet. That is why I am excited to apply for the Praktikant / Werkstudent Projektmanagement - Tax (m/w/d) in Berlin role at Deloitte. With hands-on experience in cross-functional product & project execution, quantitative analysis on complex datasets, and AI evaluation tooling, combined with my Bachelor's in Digital Product Management and current Master's studies in International Business Management in Berlin, I am eager to help your team turn complex problems into scalable solutions.

In my current role as a Junior Project Manager (Working Student) at Auto1 Group in Berlin, I work embedded in a cross-functional product and operations environment across nine markets. Working closely with our Product, Tech, and Analytics teams across nine international markets, I supported the rollout of an AI voice bot (routing 700,000+ calls and boosting inbound answer rates by 20%) and structured knowledge/vector databases for a chatbot managing 30,000+ monthly conversations. I also built practical internal tools—including an AI Conversation QA & Evaluation platform with bulk-review pipelines, a real-time cross-country knowledge base, and an automated customer offer tool integrating internal admin systems and REST APIs.

On the analytical and technical side, I perform quantitative analysis on complex, disorganized datasets daily—using SQL in Redash, Advanced Excel, Looker Studio, and Tableau to build reliable company-wide KPI reporting. I am comfortable working with Git/GitHub, REST APIs, cloud platforms, low-code automation tools (such as Google Apps Script), and custom evaluation/vector databases. Working in an international Berlin environment has also strengthened my German (B1) alongside my fluent English and native Spanish.

What draws me most to Deloitte is the opportunity to contribute to a dynamic, product-driven team where quantitative rigor and practical builder execution make a tangible difference. Thank you for considering my application—I would welcome the opportunity to discuss how I can support Deloitte in this role.

Sincerely,

Guillermo Hernandez
