Hiring Team

Berlin, Berlin, Germany

Werkstudent:in Energy Operations (m/w/d)

Dear Hiring Team,

After prompting more AIs and automating more workflows than I'd like to admit, I've learned that real operational impact happens where people, clear processes, and smart technology meet. That is why I am excited to apply for the Werkstudent:in Energy Operations (m/w/d) role at VREY. With hands-on experience in AI-driven workflow automation, internal tooling, and scalable process design, combined with my Bachelor's in Digital Product Management and current Master's studies in International Business Management in Berlin, I am eager to help your team streamline workflows and deliver measurable results.

In my current role as a Junior Project Manager (Working Student) at Auto1 Group in Berlin, I coordinate across business, tech, product, and customer service teams to drive efficiency across nine markets. Beyond rolling out an AI voice bot across 9 markets (routing 700,000+ calls and boosting inbound answer rates by 20%) and maintaining AI knowledge bases for a chatbot handling 30,000+ monthly conversations, I proactively built several internal tools. These include an AI Conversation QA web platform with bulk-review features, an automated Price-Lead Offer Email generator integrated with our admin system, and a real-time cross-country knowledge base for live multi-market support.

I bring strong analytical and organizational skills, hands-on proficiency in Google Workspace, Google Apps Script (JavaScript automation), Looker Studio, Tableau, and Advanced Excel, and a proactive builder mindset. I enjoy creating clarity in fast-paced environments, turning repetitive manual tasks into clean tools, and ensuring projects stay organized and on track. Working in an international Berlin environment has also strengthened my German (B1) alongside my fluent English and native Spanish.

What draws me most to VREY is the opportunity to contribute to a dynamic, forward-thinking team where structured execution and practical innovation make a tangible difference. Thank you for considering my application—I would welcome the opportunity to discuss how I can support VREY in this role.

Sincerely,

Guillermo Hernandez
